PROFILE

Full-Stack Software Engineer with 2+ years of professional experience building and maintaining backend services, frontend applications, and cloud-deployed systems. Experienced in TypeScript, Java, Spring Boot, Angular, AWS, and relational databases. Demonstrated ability to take ownership of work end-to-end from design through to production and collaborate effectively in delivery-focused teams. Passionate about building secure, reliable, and scalable systems that solve real-world problems, with a strong foundation in secure coding practices and API development.

PROFESSIONAL EXPERIENCE

Software Engineer

Lexis Nexis

Jan 2025 – present

Woodmead, South Africa

Technologies: C#/.NET, Microservices, Angular Micro-Frontends, Azure DevOps, TypeScript, AWS

- Designs and builds backend services and Angular micro-frontend features in a production environment serving real users daily
- Develops and maintains RESTful APIs that are secure, reliable, and scalable across enterprise systems
- Takes ownership of features from design through to production support and continuous improvement
- Applies secure coding practices including session management, input validation, and access control
- Executes automated testing and contributes to CI/CD pipelines ensuring reliable deployments
- Collaborates closely with engineers and product teams to deliver end-to-end solutions

Junior Developer

BI Tech Africa

Jun 2024 – Dec 2024

Johannesburg, South Africa

Technologies: Spring Boot, Vue.js, Java, C#, ASP.NET, AWS, Azure, CI/CD, JavaScript

- Built and maintained backend services and APIs for a multi-tenant SaaS platform handling real financial and business data
- Developed frontend features using Vue.js to connect users to backend payment and data capabilities
- Worked with relational databases (MySQL, MariaDB) writing queries to retrieve, join, and manage structured data
- Deployed and operated applications on AWS, contributing to reliable cloud infrastructure
- Participated actively in agile sprints, pull request reviews, and collaborative delivery cycles

Web Developer

Mushukwa Attorneys

Jan 2024 – Jun 2024

Remote

created, deployed, and maintained the firm website (html,css,js)

EDUCATION

MSc Computer Science in Trustworthy AI

University of Johannesburg

Feb 2026 – Present

Dissertation: Establishing trust in actor-oriented cloud-based machine learning systems through explainability, accountability, and transparency in distributed AI environments

BSc Honours Computer Science in Cyber Security (Cum Laude)

University of Johannesburg

Feb 2025 – Nov 2025

PROJECTS

Android Uber clone App Java, android studio, XML, Firebase authentication, Google Maps API, PayFast paygate, modern interface - Built a full-stack ride-hailing application with integrated PayFast payment gateway, handling real financial transactions end-to-end - Implemented user accounts, real-time tracking, fare estimation, and secure payment processing - Managed structured and unstructured data via Firebase and relational data stores	Nov 2021 – Feb 2023
Secure Authentication app Java, Springboot, Hibernate, JPA, SQL, JS HTML, CSS - Built a production-quality secure authentication system with token-based email verification, session management, and input validation - Designed and maintained relational database schemas and SQL queries for user data management	Jul 2024 – Jul 2024
Drone Delivery Route Optimization System Python, Flask, Socket.IO, JavaScript, HTML, CSS, Genetic Algorithm, A Search* Developed an AI-powered drone delivery system for medical supplies, using genetic algorithms for route optimization, real-time hazard-based rerouting, and an interactive dashboard for tracking and visualization.	Mar 2025 – Jun 2025
Silent Echoes Fighting GBV with AI Built an AI chat app for GBV victims with disappearing messages, multilingual support, and automated hotline referrals.	Jun 2024 – Jun 2024
Face recognition app python, pycharm Developed a face recognition app using grayscale and edge detection to enhance image processing for secure user authentication.	Dec 2023 – Mar 2024
Transcript App Java, Eclipse Developed a voice-to-text application that captures audio input and transcribes speech to text in real time.	Dec 2023 – Dec 2023

SKILLS

Backend Java, Spring Boot, Node.js, TypeScript, C#, ASP.NET , Python, Flask, RESTful APIs, Microservices	Database Management MySQL, MariaDB, Microsoft SQL Server, Firebase, SQL query writing, schema design
Frontend Angular, Vue.js, React, JavaScript, TypeScript, HTML5, CSS	Cloud & DevOps AWS, Azure, Git, GitHub, CI/CD pipelines, YAML configuration, automated build & test workflows, deployment automation
Security Secure coding practices, session management, input validation, access control, OAuth2 awareness	Practices Agile/Scrum, test-driven development, code ownership, pull request reviews, technical documentation, analytical problem-solving

LANGUAGES

AWARDS

The UJenius club University of johannesburg Top achievers	22 Jul 2021
Matric Mathematics Top achiever Thengwe High School	Oct 2020

CERTIFICATES

BI-Tech Acknowledgement certificates Three certificates: recognized as a problem solver, team player, and MVP (Most Valuable Programmer, 2025).	Standard Bank Softw Dev Job Simulation Springboot, Django, Sql, python, JAVA May 2024	Udemy Android Development Feb 2023
AI in the 4IR (university of Johannesburg) Nov 2022
